Dear Praveena and Sebastian,

Thank you for the meeting summary.

I have added the missing items the team shared during the meeting. Kindly check the final BOM on your end and confirm that all components are correct so that I can proceed with placing the order on our end.

Thanks and Regards,
Anup Kumar

Hello Together,

Here is the short summary of the meeting held today.

1. All the missing information to finalise the BOM are provided by Sebastian and team to Anup during the meeting.
2. RR LED information can be found directly by Anup by opening one of the older RR handles.
3. The RR needle bed is based on I290 which is also the latest used at ERD (@Anup,I confirmed this with Joel)..
4. Anup confirmed that there are no other blockers in order to finalise the BOM and get it approved.

Please let me know of any questions or concerns.

Thanks
Praveen

Hi Praveen and Sebastian,

I have checked the RR needle bed data. It contains only the PCB STEP file and test point names. However, this data is not sufficient to create the RR needle bed. We require the STEP file of the complete needle bed prepared for RR VT at your site.

Also, I have updated the BOM, as some data was missing earlier from my end.
Please share the Needle bed STEP file.

Thanks and regards
Anup Kumar

Dear Praveen and Sebastian,

Please find attached the Bill of Materials (BOM) for the RR VT Setup, along with the relevant reference documents.

Please review the BOM and let me know if any changes are required.

Best regards,
Anup KUMAR
